Opening Hours and Reporting:

Monday – Friday: 08:00 – 20:00

The Centre aims to offer a near walk-in service. Please call to determine availability. This does NOT apply for pacemaker patients (see below)

All scans are will be reported within 48 hours. Same day/ overnight reporting is normally available with at least 24 hours prior notice to the Centre

Scanners:

3T Siemens Magnetom Prisma

1.5T Siemens Magnetom Aera

Chenies Mews is able to offer a specialist service to scan patients with cardiac pacemakers (see below). All cardiac patients will be booked via Chenies Mews although some patients with certain pacemaker systems may need to attend the Barts Heart Centre for their scan.

Patients with Pacemakers:

When a patient has a pacemaker or ICD implanted, they are given a credit card sized ID. This usually holds all the essential information required to check the device.

For the purpose of MRI scanning, pacemakers/ ICD's are categorised into two types:

Mailing Address: 27 Westwood Street, London SW13 0LA Tel: 0207 952 6702

Registered address: c/o Sandison Easson & Co, Rex Buildings, Alderley Road, Wilmslow, Cheshire SK9 1HY

Company No: OC398136. ICO Registration ZA323077

LONDON
URORADIOLOGY

1. **MRI Conditional** – this means that under certain conditions, the device can be scanned within an MRI scanner. The device will still need to be programmed into an MRI 'Safe mode' for the scan and then reprogrammed back to its original settings post scan. This is done by a Consultant Cardiologist or cardiac physiologist. These devices can be managed, and the scan performed at the Chenies Mews Imaging Centre.
2. **Non-MRI Conditional**- this device has been deemed unsafe for MRI scanning by the manufacturer. These scans are still performed but only in the hospital setting as they incur a level of risk, including lead/ box failure. All non-MRI conditional devices are sent to Dr Charlotte Manisty at Barts Heart Centre. Chenies Mews will coordinate this appointment for the patient.

To ascertain the type of device a patient has, it is best to provide the Chenies Mews Imaging Centre with the information on the ID card so that they may perform some checks. If this information is unavailable, it is best to contact the Cardiologist or catheter lab who originally implanted the device to obtain the information required.

Pricing:

Multiparametric MRI of the Prostate: £980

Additional charge for pacemaker: £900

Lead Radiologist:

Dr Doug Pendse, Consultant Radiologist, UCH
